B Tech Information Technology
7.56 GPA

2019-2023

Skills

- Python Programming, JAVA script, HTML, CSS, jQuery, Bootstrap, MySQL, django, Microsoft Excel, AutoCAD designing, Photoshop, Good Communication

Projects

- **NFT Marketplace 3.0**

NFT Marketplace 3.0 is the next generation of online platforms where users can discover, buy, sell, and trade Non-Fungible Tokens (NFTs). These marketplaces are built on blockchain technology, ensuring secure, transparent, and decentralized transactions ^{1 2 3}.

Key Features of NFT Marketplace 3.0:

- *Decentralized and Community-Governed*: Operates on blockchain networks, allowing for community-driven decision-making and censorship resistance.
- *Multi-Chain Support*: Enables seamless interaction across various blockchain networks, expanding accessibility and liquidity.
- *Advanced Security*: Incorporates robust security measures, such as smart contract audits, wallet integrations, and anti-fraud protections.
- *User-Friendly Interface*: Offers intuitive navigation, search options, and filters for effortless NFT discovery.
- *Cross-Platform Compatibility*: Allows users to access and manage NFTs across multiple devices.
